Additional Styles Available!!!

Gates

Gate hardware is exclusively stainless steel, powder coated for years of trouble free service. Threaded rod hinges allow the homeowner ease of adjustment.

Specializing In MCA Pressure Treated Wood

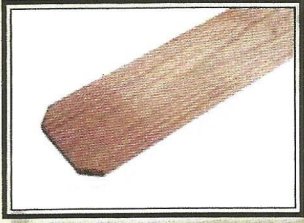

The environmentally friendly MCA wood preservative contains Micronized copper and tebuconazole dispersed in water. The preservative is manufactured with a minimal carbon footprint and provides superior performance.

Compared to ACQ and copper azole wood preservatives, MCA is:

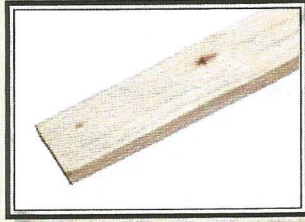

- **LOWER** significantly in rates of leaching
- **LESS** corrosive to metal fasteners
- **MORE** resistant to mold growth
- **ACCEPTABLE** for direct contact with aluminum
- **LOWER** in volatile organic compounds

Corner and line posts are 4" square. Gate posts are either 4", 6" or 8" square. All posts dug and set in concrete. Rails are 2" x 4" screwed to post using stainless steel screws. (Two horizontal rails for fence heights of 36" to 48" high, three horizontal rails for fence heights of 60" to 72" high). Pickets are nailed to rails, with galv. steel ring nails, or can be attached with stainless steel screws for a nominal additional cost.
